Software Engineer

Spicy Guitar Academy • Lagos, Lagos

02/2019 - 04/2022

Spicy Guitar Academy Web Application

<https://app.spicyguitaracademy.com>

- Developed this application with React, Redux, Zustand, JavaScript, HTML5, CSS3, Git, Github, Paystack.
- Managed State on the frontend with Redux and Zustand
- Integrated Paystack API to handle payments.
- Used Git for version control and used Github to deploy the application to Netlify.

Spicy Guitar Academy CMS

<https://spicyguitaracademy.com/admin>

- Developed the content management system for managing the eLearning application.
- Developed the front-end application with HTML, JavaScript, CSS and Bootstrap.
- Integrated the back-end REST/RESTful APIs into the application. Developed the backed API with PHP and used MYSQL store data. Used tech like Express.js, Flutter, Node.js, and PostgreSQL.
- Tested the backend API with PHPUnit and used JWT for authentication. Used Git to manage version control and deployed the app to CPanel with Github.
- It improved the management of the e-learning application by 100%

Spicy Guitar Academy Mobile Application

<https://play.google.com/store/apps/details?id=com.spicyguitaracademy>

- Developed the mobile application with Dart and Flutter, and used SQLite to manage local data on the app.
- Integrated the REST/RESTful APIs into the application. Also integrated Paystack API for payments on the application.
- Developed the backend APIs with PHP and used MySQL for data storage. Tested the backend with PHPUnit and used JWT for user authentication. Deployed the application to Google Playstore.
- Used Git for version control.

- The business was able to launch the application and has gotten over 700 customers.

Fullstack Javascript Engineer

Tensei • Lagos, Lagos

10/2021 - 03/2022

Responsibilities:

- Developed new user-facing features
- Developed backend feature architectures
- Built reusable code and libraries for future use
- Ensured the technical feasibility of UI/UX designs
- Optimized application for maximum speed and scalability
- Implemented security best practices in developing backend and frontend features
- Occasionally pair programmed with other team members
- Collaborated with other team members and stakeholders
- Improved components of the Framework by 93 on a rating scale of 100 points, resulting in a 40% increase in end-user productivity
- Developed new components of the Framework that improved the effectiveness of the application, resulting in a 23% increase in end-user productivity

Software Engineer

Sports Fans Club • Lagos, Lagos

10/2020 - 03/2021

Sports Fans Club Customer App

<https://sportsfansng.com/>

I worked on a multilevel networking application that relates to sports fan base.

- The technologies used for this project are PHP, MySQL, React, Redux, Zustand, JavaScript, HTML5, CSS3, Git, Github, CPanel, Facebook API, Twitter API, WhatsApp API, PHPUnit, JWT, Paystack.
- I worked on this project with a Professional Ui/Ux Engineer. I implemented the user interface designs and suggested improvements.
- Developed the backend API with PHP, used JWT for authentication, used MySQL for data storage, and tested with PHPUnit.
- Developed the frontend with React, HTML5, JavaScript, CSS3 and Bootstrap.
- Managed State on the frontend with Redux and Zustand
- Integrated Facebook API, Twitter API and WhatsApp API for sharing contents from the application and Paystack API to handle payments.
- Used Git for version control and used Github to deploy the application to CPanel.
- This completion of this application helped to launch the business.

Software Engineer

Mira Technologies Ltd. • Lagos, Lagos

04/2018 - 03/2021

Sysbanker EE

<https://miratechnologiesng.com/products/sysbankeree/>

This is a microfinance banking software.

- Developed the REST/RESTful APIs with PHP, and used MySQL for data storage.
- Used CRON to schedule operations in the application and tested the backend APIs with PHPUnit.
- Developed frontend pages with HTML, CSS, Javascript and Bootstrap. Integrated third party payment service (Interswitch) into the application.
- Used Git for version control and used Github to deploy the application to CPanel. Also updated the application with user customizations and maintained the application.

Mira Bulk Mail

<https://mira.mtech.ng/>

This is a Bulk Mailing and Bulk SMS software like MailChimp.

- Developed the REST/RESTful APIs with PHP and managed data storage with MySQL.
- Developed the frontend of the application with HTML, CSS, Bootstrap and Javascript.
- Tested the APIs with PHPUnit. Used Git to handle version control and deployed the application to CPanel with Github.
- Used third party libraries like CKEditor and JQuery to handle mail designing on the editor.

HaboPay

<https://www.habopay.com/>

Built a module in a payment platform.

- Developed the REST/RESTful APIs with PHP and used MySQL for data storage.
- Tested the backend APIs with PHPUnit and used Git for version control.
- Integrated third party REST/RESTful APIs into the application.

Victory Gold Networks

<https://victorygold.net>

This is an investment website.

- Assigned this project to work on alone.
- Developed the frontend of the application with HTML, CSS, Javascript and Bootstrap.
- Developed the REST/RESTful APIs with PHP and used MySQL to manage data storage. Integrated Google reCaptcha to improve the security on the website.
- Deployed and managed the application to CPanel.

Software Developer

Freelancer • Benin, Edo State

05/2017 - 08/2019

- Fully Fuzzy Linear Programming Problem Software
 - Developed the desktop application.
- Myscriptz
 - Developed the frontend application.
 - Developed the backend APIs to integrate with the frontend application.
 - Deployed the application.
- Automated Loan Management System
 - Developed the desktop application.

Skills

Javascript, Typescript, Dart, PHP, React, Flutter, Node.js, Next.js, KoaJS, NestJS, Redux, ExpressJS, HTML, CSS, SCSS (Sassy Cascading Style Sheets), Bootstrap, JQuery, Mysql, PostgreSQL, MongoDB, RxDB, REST, GraphQL, Git Actions, Git, Docker, Serverless, Google Cloud Platform, AWS CloudFormation, Kafka, AWS, System Design, Lambda Functions, Jest, Mocha, Chai, TypeORM, Prisma

Education

Computer Science

University of Benin • Benin, Edo State

12/2019

Graduated with Second Class (Upper) honor.

Publications

1. An Approach Towards the Development of Init Framework

Journal of Electrical Engineering, Electronics, Control and Computer Science. *Published 2022*
